

Dear _____ ,

Welcome to MASON!

Selecting courses for the first semester is an important step in your academic journey. As an international student, you may become eligible for PRIORITY registration if you do the following:

1. Register for the self-paced online algebra tutorial program, MATH 008, and complete all the exercises. Regardless of your math preparation to date, this online course is **mandatory**. Use [this link](#) to find instructions on how to use Patriot Scheduler. You should add only MATH 008 (**CRN 81685**) at this time.
2. MATH 008 can be completed in as little as 2 weeks. As soon as you complete the online course, send your name, G#, and a brief message indicating you have completed MATH 008 to the course coordinator via email: gbulance@gmu.edu. Completing this requirement promptly will facilitate scheduling courses prior to orientation.
3. You will be guided in your fall course selection prior to orientation if you complete MATH 008 prior to August 1. Your academic advisor will contact you about your fall semester course schedule.
4. Attend orientation on August 21, 2018.

Please let us know if you have any questions.

Sincerely,
DaFran M. Ware
Coordinator, Undergraduate Academic Advising
Volgenau School of Engineering
