Gateway	23
EXCHANGE VISITORS.....	23
MASON KOREA.....	24
APPENDIX.....	26
COUNTRY BY REGION	26

DEFINITION OF TERMS

v Who is counted as an International Student in this report?

For this report, the international student population includes students studying at any Mason campus who are nationals of a country other than the US and do not have citizenship or permanent residency in the US. This includes:

- 1) Students studying at the US campuses of George Mason University on temporary visas that allow for academic coursework. These include primarily holders of F visas (students) and J visas (exchange visitors)
- 2) Students studying at Mason's campus in South Korea who are not US citizens or US Permanent Residents

Foreign-born students who are naturalized US citizens, Permanent Residents, or undocumented are not included in the international student population for the purposes of this report.

Non-US students who remain outside the US during their course of study (therefore not requiring a visa to enter the country or other services from OIPS) will not be included. These students are primarily participating in online programs.

Also excluded from this report are students who have submitted data confidentiality requests.

v Why do the total population counts (the “N” values) vary on some charts?

Depending on the type of data being displayed, the “N” value may vary based on which students are included in that analysis. Some graphs and charts focus on a specific subset of students (i.e., only undergraduate international students), and therefore the “N” value changes accordingly.

Most graphs and charts in this report use one of the following three “N” values as described below:

- 4,202 - International students in all programs at all campuses
- 3,593 - International students in all programs, excluding Korea campus

v How are the World Regions defined?

Using the United Nations' categorization of nations as a reference, the following world region categories are used to report data in this report:

(Reference: <https://unstats.un.org/unsd/methodology/m49/>)

- | | |
|---------------------------------------|------------------------------|
| • Central America and the Caribbean | • North America |
| • East Asia | • South America |
| • Europe | • South and Central Asia |
| • Middle East (<i>Western Asia</i>) | • Southeast Asia and Oceania |
| • North Africa | • Sub-Saharan Africa |

Please see the Appendix for a list of countries included in each region for the purposes of this report.

v **What is Gateway?**

Gateway is the shorthand for the joint venture between Gateway and George Mason University to provide English language and academic preparation coursework to students who do not yet meet the academic or English language proficiency level required for regular admission to the university.

v **What do “Gateway Pathways” and “Academic English” refer to?**

Gateway Pathways and Academic English programs. Pathways students take both credit-bearing courses in their intended major field of study and English language or academic preparation courses, whereas Academic English students take only English language instruction.

v **Why are Gateway Academic English students counted separately from other international students and Gateway Pathways students?**

The University distinguishes between students taking credit-bearing courses and those who are not. Students enrolled in Gateway Mason’s Academic English program are taking only non-credit English Language courses, and therefore they are not included in the University’s official enrollment census.

Students enrolled in Gateway Pathways programs are taking some credit-bearing courses (in addition to non-credit English Language courses) and therefore they are included in the official University enrollment counts. International students not affiliated with Gateway are taking only credit-bearing courses (whether degree-seeking or non-degree students) and are therefore included in the official University enrollment counts.

v **Why are these numbers slightly different from Gateway enrollment numbers?**

The data set for this report includes *only* international students. Gateway students who are US citizens or Permanent Residents are not counted as international students for the purposes of this report, and therefore the numbers reported here may differ slightly from enrollment figures reported by Gateway.

v **What is the Korea campus? Why are those students reportedly separately?**

George Mason University opened a satellite campus location in Songdo, South Korea, welcoming its first cohort of students in 2014. Because our aim is to highlight international student presence at our US campuses and accurately portray sizes of our various demographic groups at these campuses, we have chosen to exclude from most charts and graphs the international students who are physically studying at the campus in South Korea.

It is important to note that international students who begin their studies at the Korea campus and then physically come to a US Campus for one or more semesters (using an F-1, J-1, or other entry visa) are counted amongst the general international student population for that year.

v **Why are these numbers different from Mason Korea’s enrollment data?**

The way international students are categorized and counted for this report may differ from the ways they are categorized and counted for reports produced by Mason Korea. Additionally, Mason Korea enrollment numbers will include US Citizens and US Permanent Residents who are excluded from this report.

v What is OPT?

OPT (Optional Practical Training; pronounced as the letters of its acronym (O.P.T.), not as the word “opt”) is a benefit available to F-1 non-immigrant students which permits them to obtain employment as a form of training in their major field of studies. This benefit is most commonly exercised by students immediately following completion of a degree or certificate program. Those OPT students who have already graduated from Mason are not included in any enrollment figures although they remain under the administrative purview of OIPS for the duration of their OPT. All F-1 students have the option to request 12 months of OPT following completion of their program of study.

Students in STEM fields may request an extended period of OPT for a total of up to 36 months after completing degree study. The “STEM OPT” designation refers to the additional 24 months of OPT, which is authorized by USCIS after verification of graduation in a STEM field. During STEM OPT, additional requirements for the student, the employer, and OIPS are in place to ensure the bona fides of the training aspect of the employment, including the development of a training plan and the review of training objectives and outcomes.

v What is a J-1 Exchange Visitor?

The Exchange Visitor Program is overseen by the US Department of State, which designates specific organizations, agencies, and institutions as J-1 sponsors with authorization to sponsor exchange visitors in categories relevant to the work of the sponsor. Mason is authorized to sponsor Exchange Visitors in the student, scholar, professor, and short-term scholar categories.

Unlike other visa types, the J-1 Exchange Visitor Program has an underlying foreign policy objective, to facilitate cultural learning about the US as well as to achieve the specific purpose (study, teaching, etc.) of the Exchange Visitor. Therefore, J-1 sponsors such as Mason must demonstrate annually the opportunities and participation of Exchange Visitors in cultural exchange while under our sponsorship.

The exchange of professors and research scholars promotes the exchange of ideas, research, mutual enrichment and linkages between research and academic institutions in the US and foreign countries. Exchange Visitor students have the opportunity to study at American degree-granting post-secondary accredited academic institutions or participate in a student internship program that will fulfill the educational objectives of the student’s degree program in his/her home country.

v Why do the counts of International Students on J visas (p. 7) and J-1 Exchange Visitor Students (p. 22) differ?

Not all J students attending the University have visas sponsored by the University, and therefore these two numbers will always differ based on the number of non-Mason-sponsored J students who are enrolled. (Examples of non-Mason sponsored Exchange Visitor students include those sponsored by the US government, such as Fulbright students, and those sponsored by agencies who have their own Exchange Visitor designation.) In addition, the census is taken in the Fall, and some J students sponsored by the University attend only in Spring or Summer, and therefore they are not reflected in the Fall census.

INTERNATIONAL STUDENTS

Figure 1: International Students, 2021-2025

* Please see *Definition of Terms* section for descriptions of OPT, Academic English, and Pathways.

** “Other” includes exchange students and non-degree international students who are not part of the Gateway program.

Figure 2. International Students as a Percentage of University Enrollment, Fall 2025

Figure 3. International Students as a Percentage of University Enrollment, 2021 – 2025

From this point forward, no figures/tables will include information of Mason Korea unless specifically mentioned.

$N_i = 3,593$

Figure 4. International Students in the Context of Campus Diversity, Fall 2025

Notes:

1. The graph above provides context for the representation of international students in the University's diversity statistics.
2. This figure delineates the relevant demographic differently than the other figures in this report; the data in this graph should not be compared to data elsewhere in this report.
3. The demographic categories in this figure are derived from the categories the University is required to use when reporting diversity statistics to the federal government.
4. The category "Foreigners Abroad" is a category used only internally to indicate international students who are not physically present in the US during their studies, which generally includes international students at our Korea campus and international students taking online courses from outside the US. For government reporting, these students are included in the larger "International" category.

Figure 5. International Students by Visa Type, Fall 2025

Ni = 3,593, does not include Mason Korea

Table 1. International Students by Visa Type, 2021-2025

C.B. is "Credit-Bearing"; A.E. is "Academic English".

* Students enrolled at the Korea Campus do not require US visas since they remain outside the US.

SPECIAL POPULATION

OPTIONAL PRACTICAL TRAINING (OPT)

Figure 19. International Students in Optional Practical Training (OPT), 2015–2025

Note: These data are not part of the official University census and are based on records maintained in Office of International Programs and Services. As of May 10, 2016, students in STEM fields have been able to request a total of 36 months of OPT. The increase in the number of OPT students reflects this change.

INTERNATIONAL EMPLOYEES
